WELCOME!

Thank you for donating your time and energy as a volunteer at our ReStore and/or Construction Sites. Your involvement in our mission will provide the opportunity of homeownership to individuals and families who live and work in our community.

Last fiscal year, volunteers provided 29,230 hours of service. Those hours of service are equivalent to 14 full time employees. Needless to say, our mission can be fulfilled only through the efforts of individuals like you.

If you have any questions, would like to go on a Habitat tour, or have suggestions of how we can enhance the volunteer experience, call me at 985-888-1214 ext 4 or email jstromain@habitatstw.org

Thank you,

Jeff St. Romain
President/CEO
Habitat for Humanity St. Tammany West
Our vision is a world where everyone has a decent place to live. Founded in 1981, Habitat for Humanity St. Tammany West, (Habitat STW) was the first affiliate in Louisiana and the 10th in the country. We have since built more than 264 homes, completed over 17 major renovations, and impacted the lives of over 1,000 families in western St. Tammany Parish.

Mission
Seeking to put God's love into action Habitat for Humanity brings people together to build homes, communities and hope.

Principles
1. Demonstrate the love of Jesus Christ.
2. Focus on shelter
3. Advocate for affordable housing
4. Promote dignity and hope.
5. Support sustainable and transformational development.

September 1, 1981 Habitat for Humanity St. Tammany West was founded by Emily Diamond, The Eucharistic Missionaries of St. Dominic and Reverend Steve Holzhalb.
1982 First Habitat STW home was built and sold.
1985 Habitat STW began tithing to Habitat Uganda. Our tithe is now over $500,000, and we have served over 150 Habitat Uganda partner families.
January 1988 The Habitat Home Store, also known as "Habitat Flea Market," opened at 919 North Columbia Street in Covington.
2006 - 2009 Over 4,300 volunteers from around the world came to Habitat STW to build homes post Katrina
June 2007 - October 2015 Record breaking tithe year with $94,000 going to Uganda, helping 22 families and funding the construction of 150 homes in Uganda.

July 30, 2007 100th Habitat STW home build and sold.
May 15, 2008 Jimmy Carter visited Habitat STW to help build 10 homes as part of the Jimmy Carter Work Project.
April 25, 2009 The ReStore and Home Store combined, to form the store we know today on North Lane in Mandeville.
May 20th, 2011 Habitat STW celebrated its 30th anniversary by selling its 200th home.
June 28th, 2012 The first home to be fully funded by the Habitat STW ReStore was built.
November 2015, Hosted volunteers from across the nation, including Jonathan Reckford, for the Decade of Dedication event, commemorating ten years since Hurricanes Katrina and Rita.
December 15th, 2016 Habitat STW sold its 250th home.
OUR COMMUNITY

Habitat STW is located just north of New Orleans, across Lake Pontchartrain. St. Tammany is rich with history, scenic beauty, vibrant downtowns, independently owned restaurants and numerous festivals. For more than a century St. Tammany Parish has been seen as place to get away from the city. Now, St. Tammany is becoming a destination in its own right.

The Need

Homes values in St. Tammany Parish are significantly higher than the average home price in Louisiana. We find that over 30% of homeowners are mortgage burdened, while over 50% of households are considered rent burdened. The average worker in St. Tammany Parish would need to work almost 60 hours a week to simply afford to rent a two bedroom apartment in the parish. We believe that families that work in St. Tammany Parish should be able to afford to live and raise their children in St. Tammany Parish.

Why We Build

1 in 8 children in St. Tammany live in poverty.

358 families still lack plumbing facilities.

An individual working full time at the mean renter wage of $12.28 needs to work 1.5 jobs to be able to afford to rent a two bedroom apartment.

Where we Build

Since 1981, Habitat STW has welcomed over 264 families into safe, decent, and affordable housing. Our Energy Star rated homes are sold to homebuyers with an affordable mortgage. Habitat STW homebuyers complete a minimum of 300-400 hours of sweat equity, by taking home ownership classes, working alongside other families to build homes, building their own homes, and volunteering in other capacities. Habitat STW is currently building houses primarily in the areas of Abita Springs, Covington, and Mandeville. We like to say that many residents drive Habitat STW homes on the way to work or school and they don't realize it is a Habitat home.
**OUR HOMEBUYERS**

Our homebuyers are the heart of our ministry. The following is some information on how we select and partner with qualifying homebuyers.

<table>
<thead>
<tr>
<th>Homeownership Qualifications</th>
<th>Repayment</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Residency - must live or work in west St. Tammany Parish</td>
<td>Habitat offers a HAND UP not a hand out. Habitat builds and sells homes to qualified families at no-profit.</td>
</tr>
<tr>
<td>- Need - must currently be living in inadequate housing (substandard, dangerous, overcrowded, temporary, too expensive)</td>
<td>- Homebuyers take on an affordable mortgage with 0% interest</td>
</tr>
<tr>
<td>- Ability to Pay – must meet income and credit requirements to demonstrate the ability to pay the mortgage regularly</td>
<td>- A silent 2nd mortgage covering the difference between the value of the home and the amount that the family can afford to pay, is forgiven gradually over the life of the mortgage</td>
</tr>
<tr>
<td>- Willingness to Partner - must agree to attend educational classes, complete sweat equity, and work with Habitat in an ongoing partnership</td>
<td>- The average mortgage payment for a Habitat STW homebuyer is $400 a month.</td>
</tr>
</tbody>
</table>

**FAQ's**

- How long does it take to build a home?
  - About 20 weeks
- How much does it cost to build a home?
  - An average Habitat STW home costs about $110,000 to build, including land.
- Where do you get funding?
  - 230+ monthly mortgage payments, Re-Store profits, grants from foundations, companies, government; and donations from individuals, businesses, churches, synagogues, and civic clubs.
## WHAT TO EXPECT

Your work day or week will begin with a Habitat STW orientation that will familiarize you and/or your team with our affiliate, our programs, and the housing need that motivates us in our mission. We will work closely with you to finalize an itinerary that best fits you and/or your team.

### New Home Construction:
Our construction volunteers are vital to Habitat's mission. We offer volunteer opportunities year round. Throughout the year we rely on teams from the Care-A-Vanner program, Collegiate Challenge, faith organizations, schools and local businesses, as well as local volunteers who come once a year or once a week to complete our construction calendar on schedule. We are always excited to introduce new volunteers to the construction site. No previous construction knowledge or experience necessary!

### ReStore:
The ReStore depends on enthusiastic volunteers for everything from helping customers to arranging merchandise. Whether you enjoy interacting with the public or prefer tinkering behind the scenes, chances are that we have a volunteer opportunity for you. The ReStore has very flexible volunteer opportunities available year round.

### Women Build:
Women Build is an annual project in which Habitat STW empowers women, without excluding men, to build homes, enabling them to positively impact the lives of families by making home ownership a reality. During the 2017 Habitat STW Women Build over 400 volunteers contributed 3,000 volunteer hours during October to help build two homes in Covington. Women Build volunteer opportunities fill up fast and are often booked a month or two in advance.

### Special Projects:
When people think of volunteering with Habitat, they often think it will involve a hammer but that is not always the case. We are always in need of special project volunteers. Throughout the year volunteers sit on committees, help with hospitality, complete administrative and data entry tasks, and much more. Reach out to info@habitatstw.org for more information.
WHAT TO EXPECT
AS A CONSTRUCTION VOLUNTEER

Our typical volunteer construction day starts with an orientation and safety meeting at 8:30. Followed by a demonstration on tasks to be completed that day. Our Construction Staff recognize that the tasks they are asking you to complete will be new to many of you. Please always feel comfortable to ask a question. The site supervisors will work with you to ensure you have a task to meet your comfort level, that is also purposeful to the work be done.

Depending on the stage of construction, volunteers can expect to:
frame floors and walls ● build porches ● install windows and doors ● complete insulation preparation ●
paint and finish interiors ● set trusses ● landscape

Basic Construction Schedule:
Our construction schedule is a very fluid one. All of our construction staff starts their day at our affiliate office, and at times our build sites are rather far from the office. Please always check as to the correct start time of specific builds.

Monday - Saturday 8:30 - 3:30

8:30 - 8:35: Registration and Sign In
8:35 - 8:50: Orientation and Safety Talk
8:50 - 11:30: Work
11:30 - 12:00: Lunch
12:00 - 3:30: Work

*We do not have any scheduled breaks. All volunteers are encouraged to break when needed.*

Upon Arrival: Please arrive on time to sign in and if needed fill out a Waiver of Liability. A new waiver is needed every year, so you may be asked to fill out a new one. Volunteers 16-17 years old must have a waiver signed by a parent or guardian.

Safety: Safety is our top priority. Volunteers are required to use all safety equipment provided and to report any injury to the jobsite supervisor. Everyone on the work site has a right to feel safe at all times.

What to bring: Please bring a bag lunch, or money for lunch, and snacks. Water is provided, but please bring a reusable bottle to help cut down on waste. You are welcome to bring your tools, but everything needed to complete a task will be provided. Please label anything that you bring.

What to wear: Weather and work appropriate clothing and closed toe, sturdy soled shoes. Please remember you may get dirty. We recommend work gloves, sunscreen and mosquito repellent.

What to leave in the car or at home: Please avoid wearing jewelry on site, it can easily be damaged or lost. Also we do not allow purses or personal bags on site. Once again, we do not want them to be damaged or misplaced. Lastly, Fido or any other pet is not allowed on site.
MEET YOUR CONSTRUCTION TEAM

Brandon Strunk, Director of Construction:
Brandon is originally from Wilmington, North Carolina. He attended North Carolina State University and then served as an AmeriCorps in Slidell at East St. Tammany Habitat for Humanity. After working as a property manager for Historic Investments in New Orleans Brandon decided to come back to Habitat for Humanity. He has been the Director of Construction with Habitat STW for 11 years.

Craig McDowell, Construction Superintendent
Craig is originally from Violet, Louisiana. He worked in commercial and industrial construction before coming to Habitat STW. Craig has worked with the affiliate for almost 10 years. He truly enjoys meeting all the new people on site and seeing homeowners move into their new homes.

Jason Nelson, Site Supervisor
Jason is from Mobile, Alabama and attended school in Slidell, Louisiana. Before coming to Habitat STW he worked in construction, renovation, and remodeling for 6.5 years. Jason also served in the U.S. Navy. Jason has been working with Habitat for 7 years. A bit of a fun fact is that Jason's second daughter was born on his second day of employment with Habitat.

Jon Peyer, Site Supervisor
Jon is originally from Darien, Wisconsin. He attended the University of Wisconsin - Stevens Point and Madison Tech. Before coming to Habitat Jon worked as a greens keeper and carpenter. Jon started his work with Habitat in 2010 as an AmeriCorps, before quickly being hired on as a Site Supervisor. Jon worked with the affiliate for a few years before moving to a different homebuilding non-profit in New Orleans. In April of 2017 Jon came back to Habitat STW and we are glad to have him.

Joey Hasman, Site Supervisor
Joey is originally from Chicago, Illinois. Joey has a culinary background and has enjoyed learning about Louisiana cuisine. For the last five years Joey has worked in the field of construction. In early 2017, Joey decided it was time for a new adventure and moved to New Orleans. He began working with Habitat STW in September of 2017.

Katie Melucci, Volunteer and Procurement Coordinator
Katie is originally from Brown Deer, Wisconsin. She attended the University Wisconsin - LaCrosse. Katie came to Habitat STW in 2009. She served two terms as an AmeriCorps Member and worked full time with the affiliate in Development for two years. She spent a few years working with a large HVAC company in the city before recently coming back to the affiliate in December of 2017.
CONSTRUCTION SAFETY TIPS

1 - Wear the correct footwear.
   People come to the work site in many types of shoes. The types of shoes that are allowed on site are boots or other thick soled shoes. The proper footwear will not only help prevent you from hurting yourself, it will also allow you to move around the work site more freely and safely.

2 - Eat Breakfast before you come to site.
   Putting in a full day's work on a construction site is hard! Please prepare your body for the task. Coming to the work site on an empty stomach could lead to weakness. We also recommend packing a lunch and a snack.

3 - Stay hydrated.
   We work in South Eastern Louisiana, this is arguably one of the most humid climates in the United States. You will become dehydrated, it does not matter what the temperature is outside. There will always be water available on site. Take time to fill your water bottle and drink up. If you are thirsty you are already getting dehydrated.

4 - Bring sun screen and bug spray.
   The sun shines bright in St. Tammany Parish. On a nice day in January volunteers have been known to ask for sunscreen. Please pack sunscreen and bug spray.

5 - Leave your nice things at home or in the car.
   Wearing jewelry, carrying a purse, and being on a cell phone are part of everyday life, but it should not be part of your day on the work site. Jewelry can snag and get caught on objects. Bags left on the ground of a work site cause tripping hazards. Last but not least, if you are on the phone, you are not paying attention to doing your current job safely. A cell phone is a distraction, and distractions lead to accidents.

6 - If something doesn't look safe, say something.
   It does not matter how much construction training you have or have not had, if something looks unsafe say something. Please let a construction supervisor know your concern. They will either be able to address the problem at hand, or explain the situation.

7 - ASK QUESTIONS.
   Our construction team is great at answering questions. They never want you to feel unsafe or unsure of a task. Please let them know if they can help with anything.
**Construction Safety Policy (ABRIDGED)**

Safety is our **TOP PRIORITY**. Below is a brief excerpt of our safety policy, it is not a complete document. Volunteers must actively participate in maintaining a safe working environment. Please familiarize yourself with these procedures. It is a volunteers responsibility to let a construction supervisor know if they have any safety questions about a task.

### Personal Protective Equipment
- Proper clothing is essential to safety. Wear clothing and footwear appropriate for the work and weather. Loose clothing is dangerous around power equipment. Workers should wear boots or thick soled shoes at all times on the construction site. Sandals or other inappropriate footwear are not permitted.
- Work gloves are available and should be worn when necessary. Never wear gloves when operating power tools.
- Protective eyewear is available and must be worn when operating power equipment or in situations where objects may be thrown through the air (i.e. nailing).
- Hard hats are available and must be worn when overhead dangers are present.
- Dust masks are available and should be worn when working in dusty situations or around hazardous materials (i.e. insulation, concrete and cutting fiber cement products).
- Ear plugs are available to be worn in noisy situations.

### Power Tools and Electrical Equipment
- Power tools are not to be used without instruction from a construction supervisor or by a volunteer under the age of 18.
- Eye protection must be worn when operating power equipment.
- Safety devices, such as saw guards, must never be disabled.
- Carefully check power tools before use to insure that they do not have defective switches, plugs, and cords and that they are in good operating condition.
- Nail guns should only be operated by experienced and trained personnel.
- Extension cords must be in good condition without frayed or exposed wires. Power tools and electrical equipment must be grounded and protected with GFI circuits. Do not use any cord where the ground plug has been removed.

### Hand Tools
- Always use the proper hand tool and technique for the job.
- Tools should be clean and in good condition.
- Always cut away from your body.
- Wear a tool belt to carry hammers and other hand tools when possible. When working at a height, be careful not to let hand tools fall.

### Cutting Fiber Cement Products
- Concrete Siding shall be cut to via electric sheers (also known as “snips”), scoring knife, a power saw attached to a vacuum with a HEPA filter, or shear siding cutter (also known as a Guillotine cutter). Holes should be made using an electric drill with bit or hole saw.

**Concrete Underlayment** shall be cut using electric sheers, scoring knife, or shear siding cutter. Holes should be made by drilling a pilot hole and completing the cut with shears or a scoring knife.

- PPE required for cutting cement products include a N95 dust mask, eye protection and gloves. All cuts must be made outside in open air and downwind of other workers.
- HEPA filter must be good working order, and inspected regularly by designated Competent Person.

### High Work - Ladders and Scaffolding
- Inspect all ladders before use, and do not use them if you think they are unsafe.
- Extension ladders should be set up with a 4:1 ratio, 4’ up, 1’ angle back. An extension ladder should reach 3 rings above the work area. Turn feet of extension ladders so they dig into the ground.
- Step ladders, always fold the legs out all the way and lock the spreader bar. Make sure feet sit on a flat and stable surface.
- Combined weight of person and tools is not to exceed weight limit on the side of the ladder.
- Avoid a long reach which takes both shoulders extended outside of the ladder.
- Keep your hands free when climbing a ladder. Carry tools and materials in carrying devices or hand them up.
- When erecting scaffolding make sure that it is level and all feet are on solid footing. Use screw jacks (adjusting screws), not blocks, on uneven ground. Screw jacks are to be attached to a wood block wider than the base of the screw jack.
- A controlled access zone must be established at least 5’ around the base of the scaffolding to mitigate injury from falling objects.
- All scaffolding elevated 6 feet or more must be equipped with a safety railing. Store tools and materials carefully so that they will not fall.
- Scaffolding must be erected under the supervision of an HFHI designated competent person. Scaffolding must be inspected daily before use by competent person.
- Do not work on ladders, scaffolding, roofs, or other high places if you are physically unable or uncomfortable doing so.

### Clean and Safe Work Site
- A clean work site is a safe place. Maintain good housekeeping. Clean up rubbish and other scrap material daily.
- Supervisors and crew leaders should constantly be alert for unsafe work sites and should take corrective action immediately.

If someone is injured on the job, contact your supervisor immediately and call for medical help if needed. First aid supplies will always be available on the job site for minor injuries. Supervisors will report all significant accidents and/or injuries to administrative office.

**WHAT TO EAT**

Southeastern Louisiana is known for its regional cuisine; from jambalaya and red beans to crawfish etouffee and seafood gumbo. There are wonderful restaurants everywhere you turn and really some of the best food is found at the smallest convenience stores at their hot food counters. Below is a listing of some staff favorites and local specialties. This is by no means a complete listing, we hope you enjoy!

| Best Po-Boy - Bears in Covington: | Treat yourself to what locals will say is the only roast beef po-boy worth eating at Bears. It is AMAZING! They do get busy but you can call in orders to pick up. 128 W 21st Ave, Covington, LA 70433 (985) 892-2373 Closed Sundays and Mondays |
| Best BBQ - Chompers BBQ: | Delicious classic BBQ with great sides. 69399 Hwy 59, Abita Springs, LA 70420 closed Sundays |
| Best Seafood - Mandeville Seafood: | My grandpa always taught me to judge a restaurant by how many trucks where in the parking lot at lunch. This parking lot is packed! They have traditional fried seafood and boiled crawfish during the season. The prices and portions can't be beat. 69399 Hwy 59, Abita Springs, LA 70420 Lunch only Mon-Wed, lunch and dinner Thurs - Sat, Closed Sunday |

| Best of Mandeville | Liz's Where Yat Diner: An old fashioned dinner through and thorough. Great food. 2500 Florida St, Mandeville, LA 70448  
Barley Oak: Upscale pub food, wide variety of craft beer and a beautiful view of the lake. A great happy hour spot to watch the sun set. 2101 Lakeshore Dr, Mandeville, LA 70448  
Rusty Pelican: Great little place in old Mandeville. Indoor/outdoor seating, good food, and TVs for sports. 500 Girod Street, Mandeville, LA 70448-5204  
The Beach House: Fun outdoor restaurant right off the lake in Old Mandeville. During crawfish season they do a boil every Sunday. 124 Girod St, Mandeville, LA 70448  
Sticks n Bones: Great little BBQ joint. 1770 LA-59, Mandeville, LA 70448 Closed Tuesdays |
| Best of Covington | Sweet Daddy's BBQ: Traditional BBQ and the perfect corn nuggets! 420 S. Tyler St. Covington, LA 70433 Closed Sundays  
Chimes: Little bit of everything with a Louisiana spin. They also have a fun outdoor walking trail. Great for large groups. 19130 W Front St, Covington, LA 70433  
Busters Place Restaurant and Oyster Bar: Great raw oysters and traditional Louisiana seafood dishes. 519 E Boston St, Covington, Louisiana 70433  
Don's Seafood: A great regional chain offering a wide range of seafood cooked in a southern style. Great for groups. 126 Lake Dr, Covington, LA 70433  
Acme Oyster House: Lively New Orleans-based chain offering the classics. Great opportunity to taste all the New Orleans classics in one spot. 1202 N Highway 190, Covington, LA 70433 |
### WHAT TO DO

Before embarking on your adventure in St. Tammany, a great first stop is the Visitor Center. They are located at 68099 Hwy 59, Mandeville, LA 701471. Pick up brochures, maps, and recommendations from staff to help you on your journey!

You can also visit [http://www.louisiananorthshore.com/](http://www.louisiananorthshore.com/) for a full listing of local events, attractions, restaurants and festivals.

WHAT TO PACK

The following is a sample packing list that includes items specific to the work site. Please remember to check with your accommodations for specific things you may or may not need during your stay.

**Personal Items for the Work Site:**
- Sturdy closed-toe shoes
- Old clothing/work clothes that can get dirty
- Work gloves
- Extra layers during colder months
- Hat or bandana for sun protection
- Raincoat or poncho
- Water bottle
- Sunglasses
- Sunscreen and bug spray
- Small cooler or lunch bag

**Tools for the Work Site - Optional**

All tools that you need for the job will be provided on site. If you would like to bring personal items we would recommend the following. Please make sure they are all in good condition and labeled.

- Work gloves
- Tool belt
- Safety glasses
- Hammer
- Tape measure
- Hard hat
WEATHER AND CLIMATE

People in South Eastern Louisiana like to tease that the four true seasons are Crawfish, Snowball, Football and Carnival Season. We really don't see the typical four seasons in St. Tammany. We are warm or hot for most of the year and a few weeks we will see chilly temperatures. It is imperative that you check the weather forecast before you visit, but here are a few tips.

Winter: St. Tammany can see temperatures in the 30s for a few weeks each year. It is very important to pack in layers for these chilly days, as it usually warms up by the afternoon.

Spring / Early Summer: Spring weather is a very special thing in St. Tammany, the few mid 60 degree days that we see are very special. In the spring and early summer temperatures can vary greatly and we can see temperatures hold in the 80s.

Summer: Summer in St. Tammany is typically very hot and humid. An afternoon hour long rain shower is very common and the perfect opportunity to indulge in a local delicacy, the snowball.

Fall / End of Summer: The temperature can vary greatly during this time. In the beginning of October we can still be worried about heat, while at the end of October people may be wearing mittens on site.
## OTHER WAYS TO BE INVOLVED

### Donate

- Goods and services to the ReStore. In-kind products and professional services are also welcome. Please call the ReStore, 985-898-0642, for more information.
- Money or land. If you would like to donate buildable land or would like to discuss other tax-deductible donation options, call 985-893-3172, ext 244.
- Sponsor a home in full, or in part through your business, church or other organization. The cost to build a Habitat STW home in 2018 is approximately $110,000.

### Shop

Our Restore, which sells new and recycled building supplies, fixtures, appliances, furniture, clothing and other gently used home goods. The more you buy, the more we can build.

- **Store hours:**
  - Tuesday - Saturday: 9:00 am-5:00 pm
- **Donation hours:**
  - Tuesday - Saturday: 9:00 am-4:00 pm
